Although the volume of international financial flows has not returned to its pre-crisis level, international financial markets are again displaying a sense of calm. International trade has also largely recovered from the setback it suffered following the financial crises. Part two. Escaping the Poverty Trap: identifies a number of critical steps for the poorer countries to break out of their 'poverty trap' and find a path to sustained and sustainable development. The objective of part two is to identify some of the actions that countries can take to start a period of rapid and sustained growth Islam, S. and M. The LAC region experienced a growth spurt with equity during the first decade of the 21st Century. It is well understood that an unsustainable demand boom fueled by terms-of-trade improvements drove this growth acceleration episode, especially in South America.
