BRAND NEW, The Beyond Access Model: Promoting Membership, Participation, and Learning for Students with Disabilities in the General Education Classroom, Cheryl M. Jorgensen, Michael McSheehan, Rae M. Sonnenmeier, How can educators create inclusive classrooms where students with intellectual and developmental disabilities not only participate and communicate, but also learn academic content? The groundbreaking model in this book is the answer. Practical, forward-thinking, and person-centered, "The Beyond Access Model" shows education professionals what meaningful inclusive education looks like and gives them the critical guidance they need to make it happen. A researched approach developed by three inclusive education experts from the University of New Hampshire's respected Institute on Disability, the Beyond Access Model works because it: presumes competence and encourages high expectations, so all students reach their full potential; and, is consistent with the problem-solving framework of the popular and effective Response to Intervention model. This accessible book guides educators and administrators through every phase of the Beyond Access Model, from assessing current student supports to reviewing and sustaining the benefits of new inclusive education strategies. Vignettes and examples - including a detailed, real-life 'before and after' case study - vividly illustrate...

Inclusive education has been identified as a focus area for investigation, toward exploring what research has been found to work in improving not only school attendance but also school achievement and other learning outcomes for students with disability. This report presents an overview of inclusive education in an international and Australian context. It provides an analysis of the current provision of inclusive education in the Australian government school sector, and will be complemented by a further review than analyses the current provision of inclusive education in the Australian non-gov High-quality learning environments based on what works in education benefit all students and can be particularly beneficial for children with disabilities. This article contributes to advance knowledge to enhance the quality of education of students with disabilities that are educated in special schools.Â Most of these students had participated in the interactive learning environment for three school years, and others did it for one or two school years; therefore, the number of students participating in the groups varied between school years in a range between 25 and 30 students. More detailed information about the students is presented in Table 1.

Access to education for students with disabilities in the United States has been mandated by legislation such as the Individuals with Disabilities Education Act (IDEA), as well as IDEA's historical predecessor, the Education for All Handicapped Children Act. Other legislation, such as the Americans with Disabilities Act (ADA) and the Rehabilitation Act, has supported efforts to ensure that Americans with disabilities have access to a quality education through the provision of classroom accommodations. In addition to legislative mandates, a number of programs set up by government agencies at al The Beyond Access Model 1st edition.
