Weâ€™d love your help. Let us know whatâ€™s wrong with this preview of Mexico, Central, and South America by Jorge I. Domínguez.

Problem: Itâ€™s the wrong book Itâ€™s the wrong edition Other. The Central America (CA) and South America (SA) region harbors unique ecosystems and has the highest biodiversity on the planet and a variety of eco-climatic gradients. Unfortunately, this natural wealth is threatened by advancing agricultural frontiers resulting from a rapidly growing agricultural and cattle production (Grau and Aide, 2008).Â been affecting social and natural systems, and extremes in particular have affected large regions. In Central and South America, 613 climatological and hydro-meteorological extreme events occurred in the period 2000â€“2013, resulting in 13,883 fatalities, 53.8 million people affected, and economic losses of US\$52.3 billion (www.emdat.be). Central America is defined as a subregion of the Americas. It is bordered by Mexico to the north, Colombia to the southeast, the Caribbean Sea to the east and the Pacific Ocean to the west and south. Central America consists of seven countries: El Salvador, Costa Rica, Belize, Guatemala, Honduras, Nicaragua and Panama. The combined population is estimated at 44.53 million (2016).
