Ceramic Production in the American Southwest. Tucson: The University of Arizona Press, 1995. viii + 312 pp. including chapter references and index. \$45.00 cloth. Identification of the artifacts and features used in ceramic manufacture has become a crucial aspect of Southwestern archaeology as the organization of pottery production has assumed a pivotal role in current models of Southwestern prehistory. Regrettably, pottery-making and pottery-firing areas seldom are reported, and reliable criteria for inferring their presence at archaeological sites have not been developed. Because previous studies of southwestern ceramics have focused more on distribution than production, Ceramic Production in the American Southwest fills a long-felt need for scholars in that region and offers a broad-based perspective unique in the literature. The Southwest lacked high levels of sociopolitical complexity and economic differentiation, making this volume of special interest to scholars working in similar contexts and to those interested in craft production. ...more. Get A Copy. Amazon. Southwestern ceramics have always been admired for their variety and aesthetic beauty. Although ceramics are most often used for placing the peoples who produced them in time, they can also provide important clues to past economic organization. This volume covers nearly 1000 years of southwestern prehistory and history, focusing Product Identifiers. Production in Asia rose by just 0.9% to 9,438 million sq.m due to the combined effect of a fall in production volumes in China and Indonesia and growth in India, Vietnam and Iran. Europe registered a more substantial growth, producing a total of 1,977 million sq.m (+4.4% in the EU-28 and +7.3% in non-EU Europe), while in the American continent, total production remained essentially stable (1,436 million sq.m). The development in Africa is noteworthy: the African continent has seen very significant growth over the. In addition to Egypt, Nigeria, South Africa and the Maghreb countries, a further 7 Sub-Saharan countries (Ghana, Tanzania, Angola, Sudan, Uganda, Ethiopia and Kenya) have now joined the ranks of African tile producers as a result of Chinese investments in August 6, 2010 | History. 1 edition of Ceramic Production in the American Southwest found in the catalog.
