Signing with Your Clients: A Practical Manual for Audiologists and Speech/language Pathologists #Florence C. Vold #2001 #Gallaudet University Press, 2001 #329 pages #9781563681110

Speech-language pathology is a field of expertise practiced by a clinician known as a speech-language pathologist (SLP) or a speech and language therapist, both of whom may be known by the shortened description, speech therapist. SLP is considered a "related health profession" or "allied health profession" along with audiology, optometry, occupational therapy, rehabilitation psychology, physical therapy, behavior analysis and others. Speech-Language Pathologists and Audiologists specialize in communication and swallowing disorders, but the effect these conditions have on individuals goes well beyond trouble expressing words. So, what is really needed is a tool that will help address these problems at their core, deep in the nervous system. Without proper training, pediatric clients may be left struggling to keep up with their peers and adults may lose their independence and safety in a world growing faster and more dangerous every minute. There is help, and SLPs are talking about Interactive Metronome® (IM). Neurotiming is Main Signing with your clients : a practical manual for audiologists and speech/language pathologists. Signing with your clients : a practical manual for audiologists and speech/language pathologists.
