Advent of globalization the education system in most countries is in a state of continuous modernization and reform. Nowadays managing and leadership have become relatively recent field of study among academics, researchers. The first thing that needs to be said is before now managing and leadership were a theme of politics, traders, economics. It is a well-known fact that management and leadership have been studying only a few years in Kazakhstan's education system. First of all, let us try to understand differences between management and leadership in education system. According to the State Management of education in modern conditions should be focused on result. Final result of an educational system is a kind of personality of an individual, capable to provide competitiveness of national economy, high level of spiritual culture of the society, development of high technologies. The problems of educational resources management that arise as part of modernization in education make it relevant to work out the theory of education management process. The main distinctive feature of this theory is its innovative character. Meanwhile, making innovation studies a new scientific area has no prospects, due to, firstly, synergetic character of innovations, and secondly, the fact that innovations in education can cause both positive and negative effects. PDF | Decision making is an integral part of the functioning of any organization. To facilitate decision making in this ever-competitive world it is | Find, read and cite all the research you need on ResearchGate. To facilitate decision making in this ever-competitive world it is imperative that managers have the right information at the right time to bridge the gap between need and expectation. To facilitate better flow of information adequate Management Information Systems (MIS) is the need of the hour. Inventory Management was of prime focus in our study. MCC Limited is one of the first Indian companies to realize the potential and importance of information technology and adopt automation and IT. The organization started computerizing its systems as early as 1968.
