CHEM262 Biochemistry

First Semester 2017-2018

**Course Catalog**

3 Credit Hours. This course deals with structure and properties of biomolecules, such as amino acids, proteins, carbohydrates, lipids, and nucleic acids. The focus of this course will be on the relationship between protein structure and its biological function, generation and storage of metabolic energy, main metabolic pathways and their key steps. In addition, the role of phospholipids in determining the properties of biological membranes and their function will be discussed

**Text Book**

<b>Title</b>	ESSENTIAL BIOCHEMISTRY
<b>Author(s)</b>	C.W. Pratt and K. Cornely
<b>Edition</b>	3rd Edition
<b>Short Name</b>	BIOCHEMISTRY
<b>Other Information</b>	Publisher: John Wiley and Sons, Inc., USA.

**Course References**

**Instructor**

<b>Name</b>	<b>Dr. Ayat Bani Rashaid</b>
<b>Office Location</b>	-
<b>Office Hours</b>	Sun : 10:00 - 11:00 Sun : 14:15 - 15:15 Mon : 11:30 - 12:30 Mon : 13:30 - 14:30 Tue : 11:00 - 12:00 Thu : 09:00 - 10:00
<b>Email</b>	ahbanirashaid@just.edu.jo

**Class Schedule & Room**

**Section 1:**

Lecture Time: Sun, Tue, Thu : 10:30 - 11:30

Room: NB57

**Prerequisites**

Line Number	Course Name	Prerequisite Type
931030	BIO103 General Biology	Prerequisite / Study
912120	CHEM212 Organic Chemistry (2)	Prerequisite / Study

**Tentative List of Topics Covered**

Weeks	Topic	References
Week 1	Aqueous Chemistry	
Week 2	Protein Structure	
Week 3	Protein Structure	
Week 4	How Enzymes Work?	
Week 5	Enzyme Kinetics and Inhibition	
Week 6	Lipids Membranes	
Week 7	Membrane Transport	
Week 8	Carbohydrates	
Week 9	Metabolism and Bioenergetics	
Week 10	Glucose Metabolism	
Week 11	The Citric Acid Cycle	
Week 12	Electron Transport and Oxidative Phosphorylation	
Week 13	Lipid Metabolism	

**Mapping of Course Objectives to Program Student Outcomes<sup>1</sup>****Assessment method**

To learn the structure and functions of proteins (amino acids, enzyme kinetics and inhibitors) [1a, 1e]	
To study the various properties of water as a biological solvent. [1a]	
To study the structure and function of lipids and carbohydrates macro molecules [1a, 1e]	
To study the metabolism of macro-molecules (gluconeogenesis, glycolysis, citric acid cycle, electron transport and oxidative phosphorylation) [1a, 1e]	

Relationship to Program Student Outcomes (Out of 100%)

This textbook, *Essentials of Biochemistry* is aimed at chemistry and biochemistry undergraduate students and first year biochemistry graduate students. It incorporates the lectures of the authors given to students with a strong chemistry background. An emphasis is placed on metabolism and reaction mechanisms and how they are studied. As the title of the book implies, the text lays the basis for an understanding of the fundamentals of biochemistry. Show all. About the authors. and Linkages in Biochemistry Structurea Compound Name Amineb RNH<sub>2</sub> or R<sub>2</sub>NH or R<sub>3</sub>N or Functional Group RNH<sup>+</sup> R<sub>2</sub>NH<sup>+</sup> R<sub>3</sub>NH<sup>+</sup> N<sup>+</sup> or N (amino group) Alcohol ROH OH(hydroxyl group) Thiol RSH SH (sulfhydryl group) Ether ROR O Aldehyde Ketone R R O C H C O O. C R (carbonyl group), R C O (carbonyl group), R C R C O OH or C O OH(carboxyl group) or R C O<sup>-</sup> C O<sup>-</sup> (carboxylate group) R C (acyl group) (acyl group) O O O Ester O C Essential Biochemistry, 4th Edition is comprised of biology, pre-med and allied health topics and presents a broad, but not overwhelming, base of biochemical coverage that focuses on the chemistry behind biology. Futhermore, it relates the chemical concepts that scaffold the biology of biochemistry, providing practical knowledge as well as many problem-solving opportunities to hone skills. Key Concepts and Concept Review features help students to identify and review important takeaways in each section.

Preface Essentials of Biochemistry, is based on the earlier well-established book Biochemistry. It has been streamlined to focus primarily on the essential biochemical concepts important to medical students. If further details are needed, it is advised that the students should refer to larger parent book Biochemistry. Essential Biochemistry, 4th Edition is comprised of biology, pre-med and allied health topics and presents a broad, but not overwhelming, base of biochemical coverage that focuses on the chemistry behind biology. Furthermore, it relates the chemical concepts that scaffold the biology of biochemistry, providing practical knowledge as well as many problem-solving opportunities to hone skills. Key Concepts and Concept Review features help students to identify and review important takeaways in each section. Key Concepts and Concept Review features help students to identify and review important takeaways in each section. Categories The Essential Biochemistry website is an online companion to the introductory biochemistry textbook of the same name published by John Wiley & Sons. As such, the website material is not intended to be used as a stand-alone resource in courses, though students of biochemistry will find the online content to be a very useful study aid. The website includes 27 interactive exercises on a variety of topics, as well as 4 brief reviews of prerequisite topics like redox reactions and thermodynamics.

Key Concepts and Concept Review features help students to identify and review important takeaways in each section. Categories Essentials of Medical Biochemistry, Second Edition: With Clinical Cases is the most condensed, yet detailed biochemistry overview available on the topic. It presents contemporary coverage of the fundamentals of biochemistry, emphasizing relevant physiologic and pathophysiologic biochemical concepts. Pivotal clinical case studies aid in understanding basic science in the context of diagnosis and treatment of human diseases, and the text illuminates key topics in molecular immunology and hemostasis.
