As fish farming practices are very diverse, we have chosen to limit ourselves to small-scale freshwater fish farming in the tropics. And, as pond fish farming is the most common form of fish cultivation in these areas, the information provided focuses on pond construction and pond management. The first part of this Agrodok (Chapters 1 to 4) describes the principles of fish farming, types of fish farms, methods of fish farming, and pond maintenance and monitoring. The second part of the book gives basic guidelines for setting up a fish farm and covers the selection of a proper site, of farm type and of fish species to be cultured. Fish nutrition, health, reproduction, harvesting and post-harvesting aspects are briefly discussed. Basic fishing tackle and techniques. Hopefully, after you set the hook, you will feel the fish at the end of your line. Now is the time to try to judge the fishâ€™s size and figure out how you are going to â€œplayâ€ it. The bigger the fish, the more careful you must be to avoid breaking the line. Setting the drag (page 17) is a way for you to adjust how much resistance a fish feels when pulling on the line. If you think you have a large fish, consider loosening the drag. This allows the fish to take some line and prevents the line from breaking.
