Extra info for Languages, Compilers, and Tools for Embedded Systems: ACM SIGPLAN Workshop LCTES'98 Montreal, Canada, June 19–20, 1998 Proceedings. Example text. State . P C T p c . state . 2 WCET algorithm In order to implement the WCET simulation technique and the merging algorithm, one important issue is in which order paths should be simulated. The algorithm (see Algorithm 2) starts the simulation from the beginning of the program. Healy, M. Sj6din, V. Rustagi, and D. Whalley. Bounding Loop Iterations for Timing Analysis. In Proceedings of the 4th IEEE Real-Time Technology and Applications Symposium, June 1998. To appear. 5. C. A. Healy, D. B. Whalley, and M. G. Harmon. Integrating the timing analysis of pipelining and instruction caching. ACM SIGPLAN Workshop LCTES '98, Montreal, Canada, June 19-20, 1998, Proceedings. Editors: Mueller, Frank, Bestavros, Azer (Eds.) Free Preview. This book constitutes the strictly refereed post-workshop proceedings of the ACM SIGPLAN Workshop on Languages, Compilers, and Tools for Embedded Systems, LCTES '98, held in Montreal, Canada, in June 1998. The 19 revised papers presented were carefully reviewed and selected from a total of 54 submissions for inclusion in the book; also included are one full paper and an abstract of an invited contribution. The papers address all current aspects of research and development in the rapidly growing area of embedded systems and real-time computing. Show all. Table of contents (21 chapters).
