Basketball training can include a periodized weight training program starting at preseason right through to the end of season. Here's an outline. One emphasizing speed and agility and the other bulk, strength, and power. In basketball, guards are likely to require more agility and speed and less strength and bulk than centers and power forwards, although all of the above would be nice for every player if it was possible. For several weeks, forget about basketball and do other things. Staying fit and active with cross-training or other activities is still a good idea. Give yourself plenty of time to do it all again next year. An Overview of Cross-Training.
