Abduction: Human Encounters with Aliens. By Mack. Ratings Alien Abductions - Best of Coast to Coast AM - 6/19/19: An examination into humans getting abducted by aliens for medical experiments. Author The Best of Coast to Coast AM. Dr. John Mack and Budd Hopkins in conversation: Legendary Alien Abduction Researchers Budd Hopkins and John Mack, M.D. come together to discuss what they've learned from working with people who report the experience of being abducted by Aliens. Hopkins and Mack rarely appeared together i Author hidden experience audio. Stories of close encounters of the fourth kind, where a human is abducted by aliens, now outnumber stories of encounters of the third kind. In an early 1957 report a Brazilian farmer described being pulled into an alien spaceship and forced to have sex with a female alien, who made barking sounds during intercourse. The experience reported by Betty and Barney Hill in 1961 shares common features with many reports of encounters of the fourth kind. The Hills were driving home when they sighted a UFO. Experts agree that most people who claim alien abduction experiences are sane and sincerely believe they have encountered aliens. French proposes that a common phenomenon, sleep paralysis, could make many think they had contact with aliens. Abduction: human encounters with aliens/John E. Mack, p. cm. None of them seemed psychiatrically disturbed except in a secondary sense, that is they were troubled as a consequence of something that had apparently happened to them. There was nothing to suggest that their stories were delusional, a misinterpretation of dreams, or the product of fantasy. Alien Encounters: The Secret

Abduction experiences often run in families. Mack states that his subjects are free from psychiatric illness or psychological or emotional conditions which could account for their abductions. Yet examination of his 13 cases reveals that all reported strange experiences, neurotic symptoms or preoccupation with the paranormal from early childhood onward. One subject had been seeing a psychiatrist for seven years. Another had seizures, migraine-like headaches, visual hallucinations and a temporarily abnormal electroencephalogram. I wonder if aliens are as credulous and gullible as human beings? They could hardly be more so. John Mack, of course, realises that he has put his reputation as a professor of psychiatry on the line. *Close Encounters Of The Fourth Kind: Alien Abduction, UFOs, and the Conference at M.I.T.* C.D.B Aliens on the Moon: According to the aliens, the Moon is the key to the what the aliens are doing on Earth as well as the future of humans! John Mack is no crazy pushing an agenda of proof. The accounts presented by this respected psychiatrist point out a uniformity of abduction experiences that defies rational explanation other than what they claim to be. Providing details of alien encounters never before reported or depicted on the screen, the men and women whose experiences are related here in unforgettably vivid detail are not extremists recounting dreams or hallucinations. Rather, as Dr. Mack reports, they are survivors of harrowing, real-life experiences that challenge the most basic assumptions that make up our understanding of our existence and our role in the universe. END --This text refers to an alternate kindle_edition edition. When we first hear about alien abductions, it is easy to dismiss the entire idea as crazy or unprovable nonsense. However, after doing a little research into the matter, you will find that there is actually a lot of evidence that supports their occurrence. Since the late 1950s, there have been millions of claims from [!]. On the other hand, there have been many reported cases of friendly contact encounters, but these cases do not usually include a forceful experience where they are taken against their will. --> Join us on Telegram: Be sure you get our most important and latest content by joining our free Telegram channel. He lumps the alien abduction phenomenon together with paranormal who bend spoons, parapsychologists who sense spiritual auras, crystal healers, believers in reincarnation and psychic crime-solvers as well as tarot readers and crystal ball gazers. 'Communication between aliens and humans is telepathic, mind to mind or thought to thought, with no specific common learned language being necessary.' Most victims describe aliens as small, grey, and hairless, with large heads and long arms. The captive usually feels unable to move any part of the body except the head. Most scientists and mental health professionals explain these experiences by factors such as suggestibility (e.g. false memory syndrome), sleep paralysis, deception, and
