

# Integrating ERP, CRM, Supply Chain Management, and Smart Materials - 2001 - Dimitris N. Chorafas - 408 pages - 9780203997529 - CRC Press, 2001

Restructuring and updating of ERP and CRM software as it integrates supply chain management and delivers new killer applications. Evolving opportunities that will develop from the implementation of smart materials, automatic identification, classification systems, and quality assurance projects. Auditing the implementation, operation, and maintenance of ERP and CRM software as well as the corrective action taken on the basis of results. Internet commerce, online supply chain, and advances in technology - all available at increasingly lower costs - make systems of the past obsolete. However, by binding a wealth of interdependent issues between the covers of one book, Integrating ERP, CRM, Supply Chain Management, and Smart Materials gives you the tools you need to create proprietary, high value-added solutions. Evolving opportunities that will develop from the implementation of smart materials, automatic identification, classification systems, and quality assurance projects. Auditing the implementation, operation, and maintenance of ERP and CRM software as well as the corrective action taken on the basis of results. Internet commerce, online supply chain, and advances in technology - all available at increasingly lower costs - make systems of the past obsolete. However, just as new technology creates new opportunities, it can also create unforeseen consequences. The author outlines why the wider application of off-the-shelf programming products, new answers to supply chain requirements, and the advent of smart materials, must be examined within the perspective of each company's business challenges. This book brings the reader through the transition of ERP, CRM, and Web applications into integrative management tools. The author outlines why the wider application of off-the-shelf programming products, new answers to supply chain requirements, and the advent of smart materials, must be examined within the perspective of each company's business challenges.
