A SkunkWorks project (also known as Skunk Works) is an innovative undertaking, involving a small group of people, that is outside the normal research and development channels within an organization. Skunk Works is the name given to a secret R&D team at Lockheed Aircraft Corp. that was tasked with quickly developing a jet fighter for the United States during World War II. Skunk Works is an official pseudonym for Lockheed Martin's Advanced Development Programs (ADP), formerly called Lockheed Advanced Development Projects. It is responsible for a number of aircraft designs, beginning with the P-38 Lightning in 1939 or the P-80 Shooting Star in 1943. Skunk works engineers subsequently developed the U-2, the SR-71 Blackbird, the F-117 Nighthawk, F-22 Raptor, and the F-35 Lightning II, the latter two being used in the air forces of several countries. A skunk works team is purpose-driven, with a high degree of autonomy, and is comprised of maverick disruptive thinkers. By definition, a skunk works project is mission critical to the organization, such that failure is not an option. See: Wikipedia | Oxford | Cambridge. Team. Passionate Pursuit of Excellence. Our team is our top priority -- it's not all that matters, but it's what matters most. The challenging enterprise work we execute is too complex to be undertaken individually.
