We check all files by special algorithm to prevent their re-upload. Send. The book as originally planned was intended to meet the needs primarily of pupils in the senior forms at schools and of under-graduates up to the level of a Pass Degree. We have extended Parts II and III dealing with Preparations and with the Reactions and Identification of Organic Compounds so that the book should now cater fully for the needs of students working for Honours Degrees. We should also like to express once again our sincere thanks for the considerable help we have received from our laboratory assistants, Mr. F. C. Baker and Mr. F. E. Smith. F.g.M. b.C.s. Preface to second edition. The book is a gamut of strategies for the academic library director's success. It is very concise. (just 128 pages) but full of thought-provoking and practical discussions that can easily be applied to. any context. Each of the 13 chapters is taken by an expert to discuss a specific aspect of the various. experience in library design and function which does support some of the pretext of the book. It is with this in mind that this book might be desirable in Australia, as a building block. for the reader to help them be more confident in their participation in briefings related to.
