The vilification of popular music by government and individuals has been going on for decades. Now, for the first time, Parental Advisory offers a thorough and complete chronicle of the music that has been challenged or suppressed -- by the people or the government -- in the United States. The author is clearly against censorship, but he doesn't rave against it. The book is a good demonstration of how to feel passionately about a point but remain cool when one argues it, backing it up with facts instead of froth. This is a good reference book for the history of music (and video) censorship or attempted censorship. It shows the ridiculous as well as the warranted (in who's opinion?). While I'm sure that no one wants their child to listen to songs of suicide, sex and drugs when they are ten years old, this book, to me, enforces the fact that it is more a parental responsibility than anything else. Since that doesn't happen, the parental advisory warnings in my opinion are not censoring the material, they are used just to warn the parents that there's some content that could require parenting to guide younger people in the way they perceive it, so parents later can't go on blaming the musicians or programmers that created it for the behavior of. We've all seen the Parental Advisory stickers, it's a whole other story that you can check out here , so we won't focus on it too much. 1989 - FBI condemns N.W.A.'s "Fuck tha Police." 1990 - a bill is passed by Missouri legislators, banning the sales of records with violent and sexually explicit lyrics. Overall, it's safe to say that over the years the music censorship in the States has become much less noticeable, especially since there's such a wide variety of sources to listen to music. Who actually cares about the Federal Government's opinion, or what's in radio rotation when you can listen to any track on a streaming service? The efforts to suppress jazz were mainly local and limited to city governments wanting to ban young people from going to jazz shows.² Includes bibliographical references (p. [313]-323) and index.
