Problems and Solutions (An Aasa Critical Issues Report). by Michael Milone. 0 Ratings. 0 Want to read. 0 Currently reading. 0 Have read. Problems and Solutions (An Aasa Critical Issues Report). This edition published in January 1, 1996 by Amer Assn School Administrator. The use of technology in teaching requires nurse educators to have adequate skills to make it a powerful tool for teaching and learning. Much more effort should be put in motivating students to use various technological tools, and ensuring that they have adequate skills, particularly at the entry level. [View](#). [Show abstract](#). The curriculum of most of the current teacher educators however focused on the Pedagogy Content Knowledge (PCK) content (Shulman, 1987), the aspect that missed technology part which embrace digital fluency aspect. A digitally fluent educator can design learning using te... Using information gleaned from several developmental and educational theorists, she builds a case that using technology to over-scaffold learning tasks may not always be in the students' best interests. She suggests that not only should individual educators think carefully about the learning supports they provide students, but that departments should develop consistent models for removing scaffolds as students move through their program. They conclude their chapter by offering suggestions for approaches instructors can use to diminish the prevalence of media multi-tasking and its negative effects in their classrooms. In Chapter 6, Darren Iwamoto and Jace Hargis identify technological challenges with which 21 st century teachers are faced.
