In his presentation at the GPU Tech Conference in San Jose in May 2017 , Curtis Langlotz, Professor of Radiology and Biomedical Informatics at Stanford University, mentioned how he received an e-mail from one of his students saying he was thinking about going into radiology but does not know whether it is a viable profession anymore. But the assumption that the radiologist profession is dying, is just plain wrong. What do cat intestines, X-ray lamps and the history of medical imaging have in common? The field of clinical radiology started obviously with the quite coincidental discovery of the X-ray by Wilhelm Conrad Röntgen on 8 November 1895 in Würzburg, Germany . Vital also has a similar work-in-progress predictive analytics software for imaging equipment utilization. Medical Students: Online Training Resources.
