Each project is presented with colour photographs, site plans and sections and elevations, as well as numerous construction details. Save this picture! The Encyclopedia of Detail in Contemporary Residential Architecture reveals a completely new approach to the representation of architectural construction details. The book presents 100 of the best recent architect-designed houses from around the world, which together represent the many diverse methods of contemporary design and construction. However, rather than presenting each house as a discrete project, here, over 700 construction details have been grounded together by type in order to illustrate, and give an overall view of, the ways in which the key elements of houses are...
