(University Museum, monograph 73.) This volume is the third of four reports (and the second to be published) on the findings of an excavation in the Southwestern Peloponnese of Greece. In the 1960s an interdisciplinary group known as the University of Minnesota Messenia Expedition first explored the region of Messenia, then focused on a specific site, the Nichoria ridge, where fieldwork was completed in 1975. Volume III deals with the two major occupation phases after the Bronze Age - the so called Dark and Early Iron Age (about 11500â€”800 B.C.) and the Middle Byzantine period (about 961â€”1205 A.D.) Previous documentation on these periods has been meager; information on the Dark Age was based on the contents of scattered graves and cemeteries, and the. Excavations on the City Mound of Gordion in 1961 and 1962 reached to levels containing remnants of Bronze Age structures. The author provides a detailed stratigraphical presentation of the pottery and small finds from these strata. Bronze Age Gordion is placed in the historical and cultural context of the Anatolian Bronze Age. Professor Machteld J. Mellink has supplied a cross-section of the Bronze Age City Mound and a brief discussion of the stratigraphy. University Museum Monograph, 73.
