The American Southwest contains more than its fair share of natural wonders: Grand Canyon, Arches National Park, and Carlsbad Caverns National Park are only three of the most famous natural attractions that draw people from all over the world. The region is home to a wonderful and vibrant mix of anglo, latino, hispanic, and American Indian traditions making it one of the more diverse, interesting, and picturesque corners of America with regards to history, landscape and culture. The Southwestern United States (also known as the American Southwest) is a region defined in different ways by different sources. Broad definitions include nearly a quarter of the United States, including Arizona, California, Colorado, Nevada, New Mexico, Oklahoma, Texas and Utah. Origins of the term and historical/cultural variations. The term "Southwest" originally referred to a "major subregion" of the American South, literally being the western frontier of the larger region. The Southwest differs from the adjoining Midwest in weather (drier), population (less dense), and ethnicity (strong Spanish-American and Native-American components). Outside the cities, the region is a land of open spaces, much of which is desert. The magnificent Grand Canyon is located in this region, as is Monument Valley, the starkly beautiful backdrop for many western movies. Monument Valley is within the Navajo Reservation, home of the most populous American Indian tribe.
