**6/2/2020 10:30 AM Retirement and Self-Actualization: Why not go for it?**

\$10

There is a lot more to successful retirement than good physical health. For instance, did you know we are each born with an instinctual need to actualize our potential in life? Abraham Maslow called this the "Self-Actualizing Tendency," certain spiritual traditions call it the "Enlightenment Drive," Viktor Frankl believed this drive represents a search for meaning and purpose, while other theorists have described this desire to constantly improve ourselves as a need for perfection. This class will explore what self-actualization is, and how self-actualization or enlightenment might become a formal practice for those retirees who want to "go for it."

**Dudley Tower**, PhD, has been teaching successful aging, psychology, and personal growth courses at OLLI's Furman University campus since 2004. It will also deal with international journalism and its migration over the last couple of decades.
