I don't like reading books, but I like skimming through health books, because I'm very desperate to relieve myself of my pain and my sister's illness naturally. I'm not able to fully read the book because of my shitty attention span, but I'll just gloss over the emotional parts and see if it can help with chronic pain for both my sister and I. And ironically the first page I opened of the book landed upon emotional issues and how celery can help. Q: What events happened on this day in history? The eclipse of Thales was a solar eclipse that interrupted a battle in 585 BCE at Sardis (see map below) in western modern-day Turkey between Medes and Lydians. It's sometime called the Battle of the Eclipse. Book Preview. What Happened to History? - Willie Thompson. What Happened to History? What Happened to History? Willie Thompson. First published 2000 by Pluto Press. However, although not utilised by our tutor, Marc Bloch's The Historian's Craft happened to be upon the shelves of the departmental library, so we did at least have access to another perspective and were aware, though only very vaguely, of the existence of the Annales school of historiography. Then in 1961 our situation was transformed with the appearance in the university bookshop of E.H. Carr's What is History?, the short text which has been the introduction to historiography for a couple of generations of subsequent English-language history students and in many cases continues to be so.
