Teaching Social Studies as if it Mattered: Young Children 265 and Moral Deliberation Linda Farr Darling 15. Decolonizing the Mind for World-Centered Global Education 283 Merry M. Merryfield Binaya Subedi 16. The orientation of this book is toward the teacher as the key factor in curriculum development and change. Introduction 5 Rethinking Teaching and Curriculum If we conceive of social studies teaching and learning as activities that require us to pose and analyze problems in the process of understanding and transforming our world, the limitations of an ends-means approach to curriculum is clear. Social studies teaching should not be reduced to an exercise in implementing a set of activities predefined by policy makers, textbook authors, or a high-stakes test. "High-stakes" testing can potentially deny your child a high school diploma or force your fourth grader to repeat a year in school. These consequences, coupled with the fact that these new standardized achievement tests are often poorly understood by students and parents, can cause anxiety in even the best test-taker. What's the purpose of all of that preparation and panic? Tests measure how well students know how to take tests and how well test-taking skills are being taught. So don't despair during the countdown to the big test and keep in mind these pros to high stakes test taking. High stakes exams can cause anxiety, but yearly testing and frequent practice tests can help kids improve their test-taking abilities over time.
